## Material Compound Key

- NR/SBR: Styrene-Butadiene and Natural Rubber**  
This is a standard blend suitable for most commercial applications.
- UHMWP: Ultra High Molecular Weight Polyethylene**  
A very durable bright yellow material with a low coefficient of friction.
- TPX: Tyre Cord Hi-Fibre**  
A non-vulcanised tyre compound with nylon or rayon reinforcing fibres.
- TPE: Thermoplastic Elastomer**  
A mixture of rubber and plastic which is made up from recycled materials.

# D-Fenders and Boat Protection

Protect vehicles on land and at sea with D-fenders you can depend on.

Get peace of mind, and safely protect your vessel against both structural and aesthetic damage, with our complete range of standard rubber, PVC and TPE D-Fenders. All of our Fenders are specifically designed to absorb the force of heavy impacts, whilst reducing the risk of direct contact between the boat and the jetty or quayside. Please note – All of our B and D-Fenders are not pre-drilled as standard, but we do provide a cutting and drilling service if required.

In this section you’ll discover our complete collection of:

- Standard Rubber D-Fenders
- PVC B and D-Fenders
- TPE D-Fenders

## Fender Fitting Instructions

New to installing D-Fenders? Don’t worry, whilst every boat and yacht is different there are some standard fitting recommendations. Please visit our website and read our detailed step by step installation guide- [www.polymax.co.uk/rubber-fenders/d-fenders](http://www.polymax.co.uk/rubber-fenders/d-fenders)

### Tools You Will Need

- Tape Measure
- Reversible Speed Drill
- Putty Knife
- Sealant Application Gun
- Drill Bits

### Materials

- D-Fender
- Rigid PVC Fixing Strips
- Marine Grade Adhesive
- Stainless Steel Screws / Bolts
- Safety Goggles

### Measuring

Take time to plan the fitting of your boat and be aware of any bends or joins required.

#### How to calculate the length of fender you require

Double the boats length, add the boat’s width, then add an extra 1 or 2 meters to allow for the hull’s radius.

### Fixing Recommendations

Inserting PVC strips will help secure the fender and act as a washer for the bolts. It is recommended the fixings are between 75mm- 200mm apart, or closer for larger profiles. Be careful when drilling the fendering- if you drill too far into the boat you risk damaging the surface of the fendering with the chuck of the drill.

Tip: apply some sealant to the end of each screw before fitting to ensure the hole is well sealed!

### PVC Fender Fixing Strips

PVC strips are available to be fitted into the B or D-fender prior to installation to provide additional strength, they also prevent the fixings from pulling through the fender under pressure.

Standard Rubber D-Fenders

- SPECIFICATIONS**
- Material: NR/SBR Rubber
  - Hardness: 80 ShA
  - Density: 1.9 g/cm<sup>3</sup>
  - Temperature Resistance: -20°C to 70°C

**PRODUCT OVERVIEW**

Our Standard D-Fenders are the economical way to protect land and sea-faring vehicles from damage and unwanted contact. Commonly used on boats, quays, warehouses and loading bays, our Standard D-Fenders will suit almost any internal or external application. Available in a wide variety of stock sizes, we are also able to supply custom variation D-Fenders upon request.

White PVC D-Fenders

- SPECIFICATIONS**
- Material: PVC
  - Hardness: 80 ShA
  - Density: 1.9 g/cm<sup>3</sup>
  - Temperature Resistance: -20°C to 70°C

**PRODUCT OVERVIEW**

Our range of PVC D-Fenders offer a superior finish in comparison to our standard rubber D-Fenders. The additional protection of PVC means it won't mark or scuff surfaces it comes into contact with, making them the ideal solution for rub rails along boats and yachts. All our PVC D-Fenders are UV stabilised, phthalate free and 100% recyclable.

TPE D-Fenders

SPECIFICATIONS

- Material: TPE (Thermoplastic Elastomer)
- Hardness: 60 ShA
- Density: 1.09 g/cm<sup>3</sup>
- Elongation at Break: 700%
- Temperature Resistance: -40°C to 100°C

PRODUCT OVERVIEW

Our TPE D-Fenders are made with a specialised material for ultimate resistance to weathering, aging, UV, atmospheric agents and chemicals. Unlike our standard rubber D-Fenders, TPE is non-marking and supremely weather-resistant, giving your vessel the best protection without staining or deteriorating. All our TPE D-Fenders are made from recycled materials and are 100% recyclable after use.

Black PVC B-Fenders

SPECIFICATIONS

- Material: PVC
- Hardness: 80 ShA
- Density: 1.9 g/cm<sup>3</sup>
- Temperature Resistance: -20°C to 70°C

PRODUCT OVERVIEW

Our B-Fenders work just as effectively as their D-Fender counterparts but offer an alternative finish that creates two impact points. PVC is non-marking to stop scuffs and staining on surfaces it comes into contact with, whilst comfortably withstanding weathering, aging and high exposure to salt. All our PVC B-Fenders are UV stabilised, phthalate free and 100% recyclable.

# HGV Bumper Solutions

Versatile rubber buffers for almost any application.

Whatever you need protecting, from warehouse doors to HGVs, our range of robust rubber bumpers, tipper pads and mud flaps will be up for the challenge. All of our bumper solutions are made from hardwearing NR/SBR rubber and available in a wide selection of shapes and sizes to suit almost any application.

In this section you'll discover our complete collection of:

- Rubber Stoppers and Bumpers
- Mud Flaps
- Tipper Pads

## Rubber Stoppers

- SPECIFICATIONS**
- Material: NR/SBR Rubber
  - Hardness: 70 ShA
  - Density: 1.9 g/cm³
  - Temperature Resistance:-15°C to 70°C

**PRODUCT OVERVIEW**

Our range of affordable, hardwearing Rubber Stoppers work great as spacers, door stops or as screw-on rubber feet. Made from a durable NR/SBR material, they're available in a variety of shapes and sizes to suit your application.

## Conical Rubber Bumpers

- SPECIFICATIONS**
- Material: NR/SBR Rubber
  - Hardness: 70 ShA
  - Density: 1.9 g/cm³
  - Temperature Resistance:-15°C to 70°C

**PRODUCT OVERVIEW**

Our Conical Rubber Bumpers are specially designed to provide additional height for situations that require a taller spacer or buffer. These Rubber Bumpers are made from a hardwearing blend of NR/SBR rubber and come in two sizes as standard. Each bumper has a convenient pre-drilled countersunk hole that requires an M10 fixing bolt (sold separately) in Browse to securely fasten to your chosen surface.

Buffer Stops

SPECIFICATIONS

- Material: NR/SBR Rubber
- Hardness: 70 ShA
- Density: 1.9 g/cm³
- Temperature Resistance: -15°C to 70°C

PRODUCT OVERVIEW

Our selection of hardwearing Buffer Stops are the perfect way to protect against harsh impacts from doors and swinging objects. Each Buffer Stop has two countersunk holes to help securely fasten to your chosen surface.

Oval Rubber Bump Stops

SPECIFICATIONS

- Material: NR/SBR Rubber
- Hardness: 70 ShA
- Density: 1.9 g/cm³
- Temperature Resistance: -15°C to 70°C

PRODUCT OVERVIEW

Our two bolt hole Oval Rubber Bump Stops are great for creating a secure buffer on lorries, vans, ramps, loading bays and doors. We offer three Bump Stops depending on your needs: A solid buffer for heavy impact, a hollow cored version to suit lighter applications and an extended base version which gives 52mm clearance.

D-Type Bumpers

SPECIFICATIONS

- Material: NR/SBR Rubber
- Hardness: 70 ShA
- Density: 1.9 g/cm³
- Temperature Resistance: -15°C to 70°C

PRODUCT OVERVIEW

One of the best sellers in our bumper range, the D-Type Bumper is designed to give the greatest deflective force against heavy and repetitive impact. Made from durable NR/SBR rubber it's a simple, yet highly-effective, design to protect walls and other surfaces. The D-Type Bumper is ideal for docking bays, trucks and boats.

SKU	6006300

Rectangular Rubber Buffers

SPECIFICATIONS

- Material: NR/SBR Rubber
- Hardness: 80 ShA
- Density: 1.9 g/cm³
- Temperature Resistance: -20°C to 70°C

PRODUCT OVERVIEW

Our collection of rectangular shaped rubber buffers for use on lorries, vans, ramps, loading bays and doors.

DETAILS

The Rectangular Rubber Buffers provide effective protection against especially harsh impacts and can be easily bolted directly to your desired surface using the pre-drilled countersunk holes. Our range of Rectangular Buffers come in an array of sizes perfect for use on lorries, vans, ramps, loading bays and doors.

Heavy Duty Mud Flaps

SPECIFICATIONS

- Material: TPX
- Hardness: 78 ShA
- Tensile Strength: 3.4 MPa
- Thickness: 6mm
- Temperature Resistance:-20°C to 70°C

PRODUCT OVERVIEW

Choose from over 30 universal, heavy duty, Mud Flaps suitable for HGVs, trucks, trailers, lorries and cars. These commercial Mud Flaps are made from TPX Tyre Cord Hi-Fibre which is fabricated using compound nylon/rayon reinforcing fibres for extra protection. The entire collection of Mud Flaps can be screen printed with a graphic design of your choice.

For more information about our custom printing service please speak with a member of our sales team on +44 (0)1420 474123 or sales@polymax.co.uk.

Tipper Pads for Tipper Lorries

PRODUCT OVERVIEW

Tipper Pads are used to protect the chassis of tipper lorries. They are designed to withstand heavy and repetitive loads, protecting the bodywork of the vehicle whilst dampening the sound of the impact. Our Tipper Pads are made using a thick block of rubber, which is bonded to either an aluminium or steel base for additional protection. They can be fitted to the vehicle with bolts or welded directly to the metal work. There are three types of base to choose from: Aluminium, traditional steel or a black-painted anti-rust steel.

# Loading Bay Solutions

Complete loading bay protection from every vehicle, every time.

Our comprehensive collection of Dock Bumpers are designed to prevent damage from vehicles reversing into loading bay areas and marinas. Suitable for any industrial building, warehouse or commercial loading area, we can provide everything from large, stainless steel wall or dock-mounted bumpers, to small and sturdy rubber Bumpers that can be attached directly to the vehicle.

In this section you'll discover our complete collection of:

- Dock Bumpers
- Angle Brackets
- Front, Packer and Back Plates

**Dock Bumper Parts**

Front Plate – A stainless-steel front plate to prevent wear to the rubber component whilst still allowing for the same level of compression.

Packer Plate – An extra layer of rubber that enhances the dock bumper to suit the desired dimension. Please note, some packers require holes to be drilled.

Back Plate – Whilst the rubber bumpers can be fixed directly to the wall or dock leveller, we highly recommend using a metal backing plate. This improves the structural integrity of the buffer and makes it easy to replace if necessary.

Please Note- hanging the dock bumpers to the corresponding plates will require M24 studding which is also available to purchase on our site.

Trapezium Dock Bumpers

SPECIFICATIONS

- Material: NR/SBR Rubber or TPX
- Temperature Resistance: -20°C to 70°C

PRODUCT OVERVIEW

Our durable, weather-resistant Trapezium Dock Bumpers come in a range of industry-standard sizes that can be attached along the main contact points of the dock leveller or loading bay. Available in a trapezium design or with a straight edge, these Dock Bumpers are perfectly suited to both on-land and marine applications. Choose between the standard NR/SBR rubber or the more resilient Tyre Cord Hi-Fibre TPX rubber, ideal for high-traffic areas and larger vehicles.

Please note - 330mm Bumpers have no matching front or back plates.

High Visibility UHMWP Dock Bumpers

PRODUCT OVERVIEW

These long-lasting, high-visibility Dock Bumpers help drivers easily line up their vehicles with the dock. They are made from a high molecular weight polyethylene material to increase durability in high-impact, hardwearing environments. The smooth front plates are also designed to dramatically reduce friction and help prevent scraping and marking of vehicles. Both the front and back plate can be easily replaced if they become damaged or worn.

6009401	750L x 250W x 115H	21.5

TPX Rectangular Dock Bumpers

SPECIFICATIONS

- Material: TPX
- Hardness: 80 ShA
- Tensile Strength: 3.4
- Temperature Resistance: -15°C to 70°C

PRODUCT OVERVIEW

These strong TPX Rubber Dock Bumpers are ideal for lining protruding metalwork on HGV trailers to help prevent damage. They can also be used in pairs to line the side of vans, ramps, loading bays and doors, to further protect against heavy impacts. We offer two lengths, with either three or six bolt holes.

Product SKU	Size (mm)	Weight (KG)

Square Dock Bumpers

SPECIFICATIONS

- Material: TPX
- Hardness: 80 ShA
- Tensile Strength: 3.4
- Temperature Resistance: -15°C to 70°C

PRODUCT OVERVIEW

This small square-shaped Dock Bumper has a unique 4-bolt hole design, perfect for protecting steelwork around loading docks. Although small in size, this little bumper is made from our Type Cord Hi-Fibre rubber, making it capable of withstanding an impressive amount of force.

Please note - This has no compatible back or front plate.

L-Shaped Dock Bumpers

DETAILS

Our L-Shaped Dock Bumpers provide sturdy corner protection along the tops of loading bays or dock levellers.

High Top Dock Bumpers

DETAILS

Our High Top Dock Bumpers are designed to offer the best protection for the top of the dock leveller.

Dock Bumper Angle Brackets

DETAILS

Our sturdy, galvanised steel, Dock Bumper Angle Brackets allow standard back plates and dock bumper assemblies to be securely fixed up to 150mm above the dock. They come in two sizes, each finished in your choice of high-visibility red or yellow powder coated paint, to suit your corresponding dock bumper and back plate as required.

Three Part Dock Bumper Set

SPECIFICATIONS

- Material: UHMWP
- Temperature Resistance: -20°C to 70°C

PRODUCT OVERVIEW

This complete Three Part Dock Bumper Set is comprised of a back plate, packer and front plate. The front plate and packer plate are designed to easily slide out for quick removal or replacement. This set is one of our best solutions for preventing damage in particularly high traffic loading bays and jetties. Available in two different lengths and depths.

Slimline Dock Bumpers

SPECIFICATIONS

- Material: UHMWP
- Temperature Resistance: -20°C to 70°C

PRODUCT OVERVIEW

This set is comprised of a back plate, and a more slimline 60mm front plate that can slide out for easy removal or replacement. It is the perfect choice for when you need vehicles to reverse closer to the loading bay or jetty. Choose between a durable NR/SBR rubber front plate, or a high-visibility, low-friction, polyethylene front plate ideal for high-traffic areas.

Steel Heavy Duty Dock Bumpers

PRODUCT OVERVIEW

Our toughest Dock Bumpers in the range offer the highest level of protection against HGV trailers. This collection of tough, stainless-steel, dock bumpers perform under extreme forces; with a unique steel-encased rubber core that allows for the full absorption of force, whilst the stainless-steel body prevents wear and tear. The sloped top helps prevent trailers from overriding the dock leveller or loading bay.

Dock Bumper Front Plates

SPECIFICATIONS

- View all corresponding dock bumper parts on page 17

PRODUCT OVERVIEW

We offer a full range of Front Plates to suit any sized Dock Bumper. Attaching a Front Plate to the Dock Bumper significantly increases its durability and performance over time. The metal remains undamaged whilst the rubber Dock Bumper compresses behind the added protection of the Front Plate.

Please note - The Three Part Set, High-Visibility and Slimline Dock Bumpers are sold with a front plate included. Attaching the Dock Bumpers to the Front Plate will require M24 studding, see page 34.

Spring-Loaded Back Plates

PRODUCT OVERVIEW

Our Spring-Loaded Back Plates are fully-compatible with a selection of 450mm and 750mm high dock bumpers. It allows the bumper to slide down as the trailer is loaded, returning when the trailer moves away. This is a great solution to help prevent trailers from overriding the Dock Bumper and damaging the property.
